

Welcome to Finnish Curly Specialty Show 20.7.2024!

The show is held in Matkailutila Surkeenjärvi. Address: Surkeenjärventie 170, 41840 Moksi.

Total entry for our show is 59 Curlies. 5 in pet class, 23 dogs, 31 bitches, 5 breeder class and 3 progeny class. The Show is judged by Nigel Spraggins (Kennel Tusepo) from Great Britain.

The judging starts at 10:00 am. The show starts with pet classes following by official classes. There will be a lunch break between dogs and bitches. The judge judges approximately 15–20 dogs in one hour.

Please take enough water for your dog and don't leave dogs in a hot car. There is a lake nearby the show place where you can let your dogs swim. The show is held outside.

Please remember to print your show number. All critiques at the show will be digital, so no handwritten critiques will be handed out in the rings. Critiques will be sent via email to the email address that was used for making the show entry. Critiques can also be read from Showlink's online show results service and they will be published on the Finnish Kennel Club's online database after the show.

The show catalog will be available in Finnish Curly Club's web page for free. The link for the catalog will be open at 6:00 am on the day of the show. The catalog is in PDF form, you need an Adobe reader or other similar kind of program to view it.

Vaccination Regulations of the Finnish Kennel Club

Approved by the Finnish Kennel Club's Scientific Committee 28th March 2023, valid as of 1st June 2023

Dog shows, trials, competitions as well as other organized canine events (later referred to as event) in Finland are subject to Vaccination Regulations below. The organizer of the event has a duty to make sure that Vaccination Regulations have been followed. The dog must have a vaccination certificate (vaccination data in the Finnish Kennel Club's mobile application Omakoira App, a vaccination record, or a pet passport). The vaccination certificate must include, marked by a veterinarian, the expiration date of the vaccination, identification data of the dog, and previous vaccinations.

The first vaccination against canine distemper, canine parvovirus, infectious canine hepatitis, and kennel cough (quadrivalent vaccine, or trivalent vaccine and kennel cough vaccine) is recommended to be administered to a 12-week-old puppy. Booster vaccinations are administered in accordance with the summary of product characteristics. The first vaccination against rabies is administered to a puppy in accordance with the summary of product characteristics, usually at the age of 4 months.

A dog's vaccination certificate must clearly state the dog's identification details as well as the expiration date of the vaccination administered to the dog in accordance with the summary of product characteristics for the vaccine in question. In order to attend an event, a dog must have the following valid vaccinations:

Vaccinations against canine distemper, canine parvovirus, and infectious canine hepatitis:

A dog must be vaccinated against canine distemper, canine parvovirus, and infectious canine hepatitis.

Vaccinations administered in puppyhood or when the dog is older are valid in accordance with the summary of product characteristics for the vaccine in question. Observe the time of onset of immunity before the vaccination becomes valid.

Vaccination against rabies:

A dog must be vaccinated against rabies. Vaccinations are valid in accordance with the summary of product characteristics. Observe the time of onset of immunity before the vaccination becomes valid.

Time of onset of immunity for expired vaccinations against canine distemper, canine parvovirus, infectious canine hepatitis, and rabies:

If a dog's vaccination has expired, the vaccination must in all cases be renewed at least in accordance with the time of onset of immunity mentioned in the summary of product characteristics.

A dog may attend events the day after the time of onset of immunity has been met. In other words, if the time of onset of immunity is 21 days, the dog may attend an event on the 22nd day after the vaccination.

Further instructions for dog owners and veterinarians:

For a dog attending events, a yearly booster vaccination against kennel cough is recommended. Dogs arriving from abroad are, in addition to the Finnish Kennel Club's Vaccination Regulations, also subject to the Finnish Food Authority's valid regulations.

Please note! The Finnish Kennel Club's Vaccination Regulations may differ from vaccination requirements for import. Valid requirements can be found on the website of the Finnish Food Authority.

Other regulations regarding infectious diseases:

If a dog contracts canine distemper, canine parvovirus, infectious canine hepatitis, kennel cough, or some other similar infectious respiratory or gastrointestinal tract inflammation, the dog in question may not attend an event before it has been free of signs of the relevant disease for at least two weeks. The same restriction also applies to dogs of the same household showing no signs of the disease. Parasitic infections must be duly treated before a dog may attend an event.

On medicating dogs and withdrawal periods

The purpose of doping control is to prevent affecting performance using medications, to protect the dog from strain in case it falls ill and to guarantee sufficient recovery time for the dog. If it is known that the recovery will take longer than the withdrawal period as defined for the medication, the withdrawal period may be extended. The withdrawal period of the medication is calculated from the last date of administering the medication.

The withdrawal periods of medications can be found in the list of medications based on the active substance or medication group. In addition, medications registered for dogs and their withdrawal periods have been compiled into a table by therapy group based on the brand name and

Pharmaca Fennica Veterinaria. The list makes it easier to find the withdrawal period based on the medication's name. The list of medications is updated annually as the Pharmaceutical Information Centre's publication has been released.

Colouring the coat or the nose and altering the quality of the coat using chemical substances is forbidden.
